Introduction

Overview

The heating, ventilation and air-conditioning (HVAC) industry is in the midst of a dynamic era. However, air-distribution ductwork, a critical component of HVAC systems, has remained virtually unchanged since the early 1900s.

Several factors have introduced the need to revolutionise HVAC ductwork. Energy use has continued to escalate, and thus the demand for energy reducing solutions has intensified. Requirements for clean air are becoming increasingly prevalent. Speed of construction has become a valuable asset. Floor space and headroom are under constant pressure.

Kingspan PalDuct systems have been the pioneer in pre-insulated ducting. Pal was the first company in the world to introduce the innovative and revolutionary rigid pre-insulated ductwork as an alternative to sheet metal ductwork. It was invented by Claudio Ferraro of Bologna, Italy in 1965.

Kingspan Insulation has proven the value of its products and *Kingspan PalDuct* has been used in some of the most prestigious projects around the world, due to its known advantages over the traditional galvanised sheet metal ductwork.

Kingspan Insulation has commissioned state of the art manufacturing plants, established workshops in different regions worldwide and also provided specialised and comprehensive training courses conducted by service oriented and experienced trainers well-equipped with the latest technologies, all to ensure quality HVAC ductwork fabrications and installations. This is closely supervised by the representatives from subsidiary companies and sales offices worldwide.

In 2014 Kingspan Group acquired Pal International and assimilated it into its Insulation Division, which subsequently became responsible for the sales and marketing of *Kingspan PalDuct* products across the globe.

What is *Kingspan PalDuct* Technology?

- Complete line of components and accessories.
- Professional hand tools and automated machinery.
- Specialised training courses for ductwork fabricators.
- “Duct Design Software” to size the ductwork and estimate the material needed.
- Technical Support.

Advantages of *Kingspan PalDuct* Technology

- Easy to clean and hygienic.
- CFC/HCFC-free: helping to minimise the effects of Ozone Depletion and Global Warming
- Clean air: fibre-free insulation core.
- Lightweight: only 15% of the weight of sheet metal ductwork.
- Resistance to fungus growth.
- Space saving: flush fitting installation possible.
- Low leakage: fully sealed systems conform to the air-leakage limit of DW 144 Class C-high pressure.
- Low λ value.
- Energy saving: up to 20% annually.
- Fast-track installation: rapid erection combined with single-fix installation.
- On-site fabrication capability.
- No limits to duct sizes.
- High-compressive strength.
- High rigidity / integrity.
- Base material is impermeable to moisture.

Specialised Training & Technical Support

Kingspan Insulation provides specialised and comprehensive training courses to appointed distributors and clients in order to ensure that fabricators carry out the fabrication of *Kingspan PalDuct* Systems for any project directly on-site, assuring fast and more accurate execution of duct installation requirements.

Kingspan Insulation also provides technical support to appointed distributors and clients in order to ensure the consistent quality of HVAC ductwork fabrication and installations.

Certifications & Compliance

Kingspan Insulation is ISO certified and complies with Management System standards: ISO 9001:2008; ISO 18001:2007; and ISO 14001:2004. *Kingspan PalDuct* products have Factory Control, Product Level certification and have Product Approval issued by Warrington fire Mid-East Global Safety. *Kingspan PalDuct* panels have been tested and comply with the international standards listed below:

- EN 13501 (C-s2-d0);
- BS 476 Part 6 & 7 (Class 0);
- NFPA 101 Life & Safety Code;
- NFPA 255;
- UL 723;
- ASTM E84;
- NES 713;
- NFP 92-501;
- DW 144;
- ASTM C518;
- ASTM D1621;
- ASTM C203;

- ASTM G22;
- BS EN 826;
- UNI 8270;
- DIN 52210; and
- ASTM C209.

Kingspan **PalDuct** PIR Panels

Polyisocyanurate Insulation Panel

Kingspan **PalDuct** PIR Panels comprise a fibre-free high performance rigid thermoset polyisocyanurate (PIR) insulation core, faced on both sides with an embossed aluminium foil. The aluminium foil is lacquered with corrosion resistant polymer varnish.

Kingspan **PalDuct** Hydro Panel

CFC/HCFC-free Insulation Panel

People, nowadays, are becoming even more conscious of their impact on the environment. *Kingspan PalDuct Hydro* Panel was developed out of the concern for the increasing Ozone Depletion and Global Warming.

The *Kingspan PalDuct Hydro* system uses panels which comprise a polyisocyanurate (PIR) insulation core, that is manufactured with a CFC/HCFC-free blowing agent. The blowing agent used has zero Ozone Depletion Potential (ODP) and low Global Warming Potential (GWP).

Description

Kingspan PalDuct Hydro Panels comprise a fibre-free high performance rigid thermoset CFC/HCFC-free polyisocyanurate (PIR) insulation core, faced on both sides with an embossed aluminium foil. The aluminium foil is lacquered with corrosion resistant polymer varnish.

Features

- Environmentally responsible insulation.
- CFC/HCFC-free.
- Manufactured with a blowing agent that had zero Ozone Depletion Potential (ODP) and low Global Warming Potential (GWP).
- Base material is impermeable to moisture.
- Creates an airtight seal, which helps to achieve low air-leakage rates and provide a constant temperature inside the building.

Kingspan **PalDuct** Eco Panel

Antimicrobial Coated Panel

Microorganisms are unavoidably present in the air we breathe. Microorganisms such as bacteria, fungi and algae can be harmful and can be the cause of unwanted odours, stains and infectious diseases. They are airborne and can be easily transmitted from one person to another.

The HVAC industry has become to be increasingly concerned with the quality of air that is distributed through the ductwork in a building. Hygienic coatings for HVAC ductwork have been designed for use in locations such as food preparation areas, clinics, schools and hospitals, where it is important to limit the growth of bacteria. Moreover, this may be especially important in high humidity areas where bacteria can multiply rapidly.

Description

The *Kingspan PalDuct Eco* System uses Panels and components, which are coated in an innovative antimicrobial technology that resists against mould, mildew, bacteria, fungi and algae.

Kingspan PalDuct Eco Panel comprises a fibre-free rigid thermoset polyisocyanurate (PIR) or polyurethane (PUR) insulation core, faced on one side with an embossed aluminium foil and the other with a smooth aluminium foil. Both facings are antimicrobial coated with silver ion technology. The panels can be joined together with antimicrobial coated, green coloured aluminium and polymer profiles and adhesive materials to create a pre-insulated HVAC ductwork system that can resist the spread of bacteria.
